CONCLUSIONS

Figure 1

Diagram illustrating the experimental setup for measuring the effect of temperature on the rate of reaction between hydrogen peroxide and potassium iodide.

The diagram shows a test tube containing a mixture of hydrogen peroxide (H_2O_2) and potassium iodide (KI). The test tube is placed in a water bath maintained at a constant temperature ($T^\circ C$). A gas syringe is connected to the test tube to measure the volume of oxygen gas (O_2) produced over time. The reaction is represented by the equation:

$$H_2O_2 + KI \rightarrow H_2O + I_2$$

The experiment involves varying the temperature of the water bath and recording the time taken for a fixed volume of oxygen gas to be produced.
