Figure 1 is a schematic diagram of the experimental setup. It shows a laser beam entering from the left, passing through a series of mirrors and lenses, and then through a sample. The beam is then detected by a detector. The diagram includes labels for the laser, mirrors, lenses, sample, and detector, and shows the path of the beam.

Figure 1. The effect of the number of iterations on the accuracy of the proposed algorithm. The accuracy is measured by the percentage of correct classification. The number of iterations is 10, 20, 30, 40, 50, 60, 70, 80, 90, 100. The accuracy is 0.95, 0.96, 0.97, 0.98, 0.99, 1.00, 1.00, 1.00, 1.00, 1.00.
