18. 8. 24

[illegible]

1. The first step is to identify the problem or question that needs to be addressed. This involves understanding the context and the specific requirements of the task.

2. Next, it is important to gather relevant information and resources. This can include research, consultation with experts, and reviewing existing data or literature.

3. Once the information is gathered, the next step is to analyze it and identify the key factors that influence the outcome. This often involves breaking down the problem into smaller, more manageable parts.

4. After analysis, a plan or strategy should be developed. This plan should outline the steps that need to be taken to solve the problem or answer the question.

5. The final step is to implement the plan and monitor the progress. This involves carrying out the tasks outlined in the plan and making adjustments as needed based on the results.
