Dear All

@Depot Managers, Please drive the request below. We will need daily updated in the meeting on the progress here.

Strongbow was produced with incorrect packaging, and we need to perform a swap out in trade to fix this.

The following has been done and still needs to be actioned.

- We've taken the total stock per depot and moved good stock into a holding location on Acumatica to prevent this from being invoiced.
- Attached you will find a list of customers and total cases we need to swap – This is on a 1 for 1.
  - The customer indicated the total cases he has. As an example, 10 cases.
  - We will pick 10 cases from the isolated stock(Good stock)
  - We will then collect 10 cases with incorrect packaging (Swapping with the customer.)
    - If the customer only has 6 left, we only give him 6 and return the balance.
- Once the process is completed, we will recon the stock.
  - Both in isolation and Blocked.
- The template for uplift note attached is to be used please. Ensure that we get customer name and signature when completing the swap .
  - Please use the uplift number when capturing it on libra (Exactly so that we can track and trace )
  - Also indicate, Correct the uplift when the customer has less available .And update the tracker on Teams.

This must please be prioritized, and the aim is to have the entire recall completed by next week Wednesday .

Attention all Distribution Centres.

**Urgent notice re: Product recall notification**

Please note that we have initiated a product recall for the batch listed below.

**Product description:** Strongbow Redberries  
**SKU:** 330ml Non-Returnable Bottle  
**Batch affected:** 3340710A.

This is due to an incorrect packaging material, where the shrink wrap used was the Mozambique export shrink wrap as opposed to the local market shrink wrap as shown below.

Pic 1: Incorrect Shrink

Pic 2: Correct Shrink

Please note that the incident poses no food safety risk to the consumer but can impact the ability of customers to scan and therefore sell the product due to the barcode that reflects on the Mozambique shrink wrap.

Please ensure that all the stock with the Mozambique shrink is blocked for upliftment. In the event this product has already been distributed to your customers please initiate the recall protocol to ensure the upliftment and rework of the affected batch.

We apologise for any inconvenience caused in the process.

Regards

Muziwandile Zulu

Trade Quality Manager
