1. The first step is to identify the problem. This involves understanding the symptoms and the context in which they are occurring.

2. Next, we need to gather information. This can be done through interviews, observations, and research.

3. Once we have gathered information, we need to analyze it. This involves looking for patterns and identifying the root cause of the problem.

4. After analyzing the information, we need to develop a solution. This involves brainstorming ideas and evaluating them.

5. Finally, we need to implement the solution. This involves putting the plan into action and monitoring the results.

6. The last step is to evaluate the solution. This involves assessing the effectiveness of the solution and making any necessary adjustments.
