PAGE 7

Figure 1. Schematic diagram of the experimental setup. The subject is seated in a chair and views the target through a video camera. The target is a vertical line with a horizontal bar at the top. The subject's hand is positioned at the bottom of the bar. The distance between the hand and the target is 10 cm. The subject is instructed to move the hand to the target and hold it there for a specified duration. The video camera records the hand's position and the target's position. The data is then used to calculate the error and the time to reach the target.
