Figure 1 shows a sequence of 16 images arranged in a 4x4 grid. Each image contains a handwritten digit '4'. The images are labeled with numbers 1 through 16. The sequence starts with a clear, standard '4' in image 1 and progresses through increasingly distorted and abstract versions of the digit, ending with a highly abstract, almost unrecognizable shape in image 16. The distortions include blurring, stretching, and the addition of noise or other graphical elements.

The diagram illustrates a two-dimensional lattice structure. It consists of a grid of points. Arrows indicate interactions between nearest and next-nearest neighbors. The lattice is labeled with 'x' and 'y' axes.

The figure consists of 12 numbered line drawings arranged in a vertical column, illustrating the stages of nest development and incubation:

1. An empty, shallow cup-shaped nest.
2. A single egg placed inside the nest.
3. A single egg with a small, developing chick visible inside.
4. A single egg with a more developed chick visible inside.
5. A single egg with a chick that is nearly fully formed.
6. A single egg with a chick that is almost hatched.
7. A single egg with a chick that is hatching.
8. A single egg with a chick that is hatched.
9. A single egg with a chick that is hatched.
10. A single egg with a chick that is hatched.
11. A single egg with a chick that is hatched.
12. Two chicks in the nest.
