Figure 1. The effect of the concentration of the *Agrobacterium* strain on the transformation efficiency of *Agrobacterium* strain 101. The concentration of the *Agrobacterium* strain 101 was varied from 10 to 1000 cells/ml. The transformation efficiency was determined by the number of transformants per 100 cells. The data are the mean $\pm$ SD of three independent experiments. The transformation efficiency was significantly higher at 100 cells/ml than at 10 and 1000 cells/ml ($P < 0.05$).
