The figure consists of 12 small, vertically arranged line drawings. Each drawing depicts a different developmental stage of a larva. The stages progress from a small, simple, segmented worm-like creature at the top to a more complex, segmented insect-like creature at the bottom. Key features include the development of antennae, legs, and a more defined head and thorax. The drawings are labeled with numbers 1 through 12, indicating the sequence of development.

Figure 1 consists of 15 sub-diagrams labeled (a) through (o), arranged vertically. Each diagram shows a grid of points. (a) shows a set of points. (b) shows one point selected. (c) shows a point moving. (d) shows one point selected. (e) shows a point moving. (f) shows one point selected. (g) shows a point moving. (h) shows one point selected. (i) shows a point moving. (j) shows one point selected. (k) shows a point moving. (l) shows one point selected. (m) shows a point moving. (n) shows one point selected. (o) shows a point moving.

Chemical structures 10 through 19 are displayed vertically. Structures 10-19 include various substituted benzene rings, heterocycles, and complex organic molecules with multiple functional groups and substituents.
