Figure 1 is a schematic representation of the experimental design. It shows a sequence of events: a subject is presented with a stimulus (a face), then a response is recorded (a button press), and finally, the subject is presented with a feedback stimulus (a face). The response is recorded by a computer system.

Journal of Management Education 30(6)

[Handwritten notes in cursive script, likely bleed-through from the reverse side of the page.]

[illegible]

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The number of transformed cells was determined by the number of colonies on the selective medium. The results are the mean of three independent experiments. Error bars represent standard deviation.

[illegible][illegible]

The figure is a flowchart illustrating the experimental design. It is organized into two main vertical columns: 'Pre-Test' and 'Test'. Each column contains a sequence of steps leading to a final 'Result' box.

- Pre-Test Column:**
 - Pre-Test 1:** This section includes 'Pre-Test 1a' and 'Pre-Test 1b'. It leads to a 'Result' box.
 - Pre-Test 2:** This section leads to a 'Result' box.
- Test Column:**
 - Test 1:** This section includes 'Test 1a' and 'Test 1b'. It leads to a 'Result' box.
 - Test 2:** This section leads to a 'Result' box.

Arrows indicate the flow from the 'Pre-Test' section to the 'Test' section, and from each sub-section to its respective 'Result' box.

1. $\frac{1}{2}$
