1. The first part of the paper is devoted to a review of the literature on the topic. It starts with a general overview of the concept of "social capital" and its measurement. Then, it discusses the role of social capital in the context of organizational performance and innovation. The second part of the paper presents the empirical findings of the study. It includes a description of the sample, the data collection process, and the results of the statistical analysis. The third part of the paper discusses the implications of the findings for theory and practice. It also provides some suggestions for future research.

Figure 1 displays 12 histograms showing the distribution of the number of non-zero elements in the vector x for different values of n (10, 20, 30, 40, 50, 60, 70, 80, 90, 100, 110, 120). The x-axis is labeled 'x' and ranges from 0 to 120. The y-axis is labeled 'count' and ranges from 0 to 100. The distributions are centered around 60 for $n=10$ and shift to the right as n increases, with the peak count increasing from approximately 100 for $n=10$ to over 1000 for $n=120$.
