1000

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in YEA medium for 24 h at 28°C. The cell concentration was adjusted to 10⁸ cells/ml. The cells were then mixed with the plant tissue and the transformation efficiency was determined. The results are shown in Table 1.

[illegible]

The figure consists of a 4x4 grid of 16 small images. The images show a progression from a simple line drawing of a face to a more realistic, shaded portrait. The progression is likely related to the 'face completion' task mentioned in the text.
